Summary

Intermediate full-stack software engineer with 2+ years of experience building web and mobile applications in Python, JavaScript and Dart. Shipped TikuShop, an ecommerce platform with online payments, and built an AI-powered file management app during an internship at Digimark Consulting SARL. Completing a Master's in Computer Engineering in 2027 and seeking a remote software engineering role.

Technical Skills

- **Languages:** Python, JavaScript (including vanilla JS), Dart
- **Backend:** Django, Django REST Framework
- **Frontend and mobile:** React.js, Flutter
- **Other:** AI-assisted application development, version control with GitHub

Experience

Software Engineering Intern, Digimark Consulting SARL, Yaoundé, Cameroon · Aug 2026 – Oct 2026

- Designed and built a smart file management app that uses AI to carry out file-management jobs described by the user.
- Turned user-provided instructions into automated actions on files.
- Delivered the project within a two-month internship, following earlier internships at the same company.

Software Developer, 2+ years of hands-on experience

- Built and shipped full-stack web applications with Django and React, from backend APIs to user interfaces.
- Developed mobile and web features in Flutter, Dart and JavaScript.

Projects

TikuShop · tikushop.com

- Built an ecommerce platform where users browse products, shop online and pay from home.
- Developed the backend with Django REST Framework and the frontend with React, including online payment integration.

Personal Portfolio · tikufaith.tikushop.com

- Designed and deployed a portfolio website presenting my projects, skills and contact details.

Education

Master's in Computer Engineering, National Higher Polytechnic Institute (NAHPI), Bamenda, Cameroon · Expected 2027

Languages

- English (fluent)
